Basic Meal Plan

Introduction

This meal plan was designed as a rough guide. For this reason, recipes contain only ingredients and not step-by-step instructions. The user is encouraged to use their creativity to assemble the dish in their own way, and to add (or remove!) extra ingredients as they see fit (although it is good practice to have, at minimum, a meat, a carb and a vege each meal). You will also notice that you will not be cooking every day. This is intentional. On the days you do cook, make enough to last ~ 4 meals, so that you have enough food to last you until you cook again (lunches & dinners).

I recommend shopping on Sundays. However, this scheduling (and the days on which you cook) can easily be re-organized. Just pick a schedule that works for you and stick with it.

The layout of this document was organized so that it can be printed and taken with you to the store and used as a shopping list.

"Sunday Prep" is only necessary if you find yourself short on food throughout the week. The first time I tried this meal plan, I only made the cookies:).

Another tip: buy fresh ingredients. It's healthier. Also, it is worth the few extra dollars to get fresh cilantro/parsley/basil/rosemary/thyme. Mince it up and put it in a container at the beginning of the week and add to any/all recipes as you go. Also, this guide doesn't mention it, but invest in some spices. It's well worth it.

Generally, I cook (and reheat) my food with olive oil. Please stay away from seed oil and anything with trans fats, as it is unhealthy. Butter also works great.

As an occasional substitute for plain water, I had fun making cold teas in the fridge using a mason jar, tea bags and fresh lemons/limes. Use a bigger mason jar to get several cups out of each teabag. If you don't add sugar, this is healthy.

In addition to this meal plan, make sure you are eating some fruits. Another good way to get more vitamin C is to buy juice boxes, they usually have 1 day's worth per box (although it is inferior to real fruit). Apples, oranges and bananas are generally cheap options that last a good chunk of time in the fridge.
